

# IT26L - First Laboratory Examination

## HTML/CSS Website Design for a Local Resort

### **\*\*Objective:\*\***

The objective of this lab exam is to assess your understanding and application of HTML and CSS by designing a website for a local resort. You will create a minimum of 5 pages, each with unique content and styling.

The resort website you will be creating should represent an actual local beach or inland resort within the Davao region and before using any images from the resort's social media account, you must seek permission from the resort's management or appropriate authorities to ensure that you comply with copyright laws and respect the intellectual property rights of the resort.

### **\*\*Requirements:\*\***

Your website must include the following pages:

1. Main page (Landing Page)
2. Cottages
3. Room Rates
4. Reservations
5. About Us

### **\*\*Guidelines:\*\***

1. **Main Page:** This page should serve as the homepage of the resort's website. It should include:

- A welcoming hero image and a header with the resort's name.
- Brief information about the resort and its key features.
- Navigation links to other pages.
- Any additional content or elements you deem necessary for a compelling homepage.

2. **Cottages:** This page should showcase the cottages available at the resort.

**Design a card using CSS that include:**

- Images and descriptions of each cottage.
- Features and amenities of the cottages.
- Any pricing or availability information if applicable.

3. **Room Rates:** Provide information about the room rates offered by the resort. Include:

**Design a card using CSS that include:**

- Pricing details for different types of rooms (e.g., single, double, suite).
- Any special offers or packages available.
- Clear and concise presentation of pricing information.

4. **Reservations:** Create a page where visitors can make reservations. Include:

- A reservation form with fields for name, email, check-in/check-out dates, and any special requests.
- Instructions for submitting the reservation form.

5. **About Us:** This page should provide background information about the resort. Include:

- History and background of the resort.
- Mission statement or values.
- Contact information and location details.

**\*\*Evaluation Criteria:\*\***

Your website will be evaluated based on the following criteria:

**HTML Structure:** Proper use of semantic HTML elements, clear organization of content.

**CSS Styling:** Consistent and visually appealing design across all pages.

**Layout and Design:** Effective use of layout techniques, attention to detail in design elements.

**Content Presentation:** Clarity and conciseness of information presented on each page.

**Creativity and Originality:** Originality and creativity in design choices and content presentation.

**\*\*Submission Instructions:\*\***

- Your completed website must be submitted via Github repository add you teacher as collaborator to your repo.
- Include a README.txt file with any additional instructions or notes.

**\*\*Deadline:\*\***

- The lab exam submission is due **March 6, 2024 Wednesday**.
- Late submissions will incur a penalty of **10% deduction per day**.

**\*\*Additional Notes:\*\***

- You are encouraged to use your creativity and design skills to make the website visually appealing and user-friendly.
- Plagiarism or unauthorized use of pre-made templates or code snippets is strictly prohibited and will result in disciplinary action.

Show the world what you can do, Happy Coding!
